

2013 ISO 14001 and OHSAS 18001 Attestation Statement for Exxon Mobil Corporation's Operations Integrity Management System

Terms of Engagement

Lloyd's Register Quality Assurance has reviewed ExxonMobil's Operations Integrity Management System (OIMS) and has evaluated it against the requirements of the international standard for Environmental Management Systems, ISO 14001:2004 and Occupational Health & Safety Management Systems, OHSAS 18001:2007. The objectives of the review were to confirm that the design of the OIMS continues to meet the intent of the ISO 14001 and OHSAS 18001 requirements, to make a broad determination on the status of its implementation globally across the Corporation and to evaluate the continual improvement of environmental, occupational health & safety performance.

LRQA's Approach

Our attestation approach addressed each of the following steps in the overall assessment process:

- Evaluation of OIMS conformance to ISO 14001 and OHSAS 18001, including Corporate OIMS Expectations and translation to management systems for Upstream, Downstream and Chemical Business Units;
- Review and evaluation of the OIMS assessment process and results for the Upstream, Downstream and Chemical Business Units;
- Evaluation of continual improvement as measured by the OIMS assessment process, programs to set and achieve environmental, occupational health & safety goals and objectives, and improvements;
- Annual visits to review OIMS implementation at Upstream, Downstream and Chemical and Corporate Headquarters for the period covering 2011 to 2013
- Annual sampling of 11-12 sites covering all three business units and operations in 21 countries for the period covering 2011 to 2013.

Our Conclusions:

Objective evidence was available to support the following conclusions, in line with the stated objectives of the review:

The design of the OIMS has embraced the intent of ISO 14001 and OHSAS 18001 and has addressed each of the individual management systems elements.

- The OIMS is in place throughout the Corporation. Improvements in its effectiveness over time have been reinforced by a disciplined and comprehensive self-assessment process.
- Deployment of the OIMS, in particular the inclusion of Environmental Business Plans in the annual planning cycle, has continued to drive improvements in the Corporation's environmental, occupational health & safety performance.
- At the locations visited, management demonstrated high standards of leadership and accountability and all personnel interviewed showed a high degree of personal commitment to OIMS implementation, environmental protection and occupational health and safety.

It is the opinion of Lloyd's Register Quality Assurance that ExxonMobil's OIMS is consistent with the intent and meets the requirements of ISO 14001 and OHSAS 18001. We further believe ExxonMobil to be among the industry leaders in the extent to which environmental, health & safety management considerations have been integrated into its business processes for ongoing operations and for the planning and development of new projects.

This Attestation Statement is valid for three calendar years from the date of issue.

This document is subject to the provision below:
This Assurance Statement is only valid when published with the Report to which it refers. It may only be reproduced in its entirety.

Lloyd's Register Quality Assurance Limited, its affiliates and subsidiaries and their respective officers, employees or agents are, individually and collectively, referred to in this clause as the 'Lloyd's Register Group'. The Lloyd's Register Group assumes no responsibility and shall not be liable to any person for any loss, damage or expense caused by reliance on the information or advice in this document or howsoever provided, unless that person has signed a contract with the relevant Lloyd's Register Group entity for the provision of this information or advice and in that case any responsibility or liability is exclusively on the terms and conditions set out in that contract.

Due to the inherent limitations in any internal control it is possible that fraud, error, or non-compliance with laws and regulations may occur and not be detected. Further, the verification was not designed to detect all weakness or errors in internal controls so far as they relate to the requirements set out above as the verification has not been performed continuously throughout the period and the verification carried out on the relevant internal controls were on a test basis. Any projection of the evaluation of control to future periods is subject to the risk that the processes may become inadequate because of changes in conditions, or that the degree of compliance with them may deteriorate.

The English version of this statement is the only valid version. The Lloyd's Register Group assumes no responsibility for versions translated into other languages.
